Special Issue Call for Papers
Health Care Operations Management

Guest Editor: Diwakar Gupta, University of Texas at Austin

Associate Editors: Susan Feng Lu, Purdue; Soroush Saghafian, Harvard; Tinglong Dai, Johns Hopkins; Ebru Bish, Virginia Tech; Sanjay Mehrotra, Northwestern; Nan Liu, Boston College; and Carri Chan, Columbia

Overview:

The objective of this special issue is to archive an eclectic collection of high quality and state-of-the-art research related to health care operations management. Papers focusing on all health care OM topics ranging from care-process optimization to care coordination to strategic decisions at system, state, national and global levels are welcome. The following topics are of particular interest:

1. Provider payment innovations
2. Health care supply chains
3. Integration of data into care processes
4. Point of care and mobile technologies

Papers must feature original research contributions. Papers dealing with either theoretical or empirical analyses, or both, and those that rely on data-driven model formulations and analyses are also of interest.

Submissions Procedure:

Please submit your paper online at http://mc.manuscriptcentral.com/nrl. Include suggestions for AEs and referees. NRL encourages succinct and clear writing, but there are no page limits. Also, papers may include a full-length appendix. All submitted articles must address a key health problem, contain the rigor emphasized in the editorial statement of NRL, and articulate managerial relevance. Submission guidelines are available on the journal web page.

Review Procedure:

Manuscripts will be reviewed in a manner consistent with the NRL editorial policy, with the review team consisting of the guest editor, associate editors, and reviewers selected by the AEs.

Schedule:

Submission window: July 1, 2018 through December 31, 2018
Final decisions: August 31, 2019 (tentative)
Anticipated publication date: First quarter of 2020

About NRL
NRL is dedicated to publishing high-quality papers in operations research/management and general quantitative modeling. Founded in 1954, NRL has a distinguished history of publication of both seminal methodological contributions and innovative applications, see a list of NRL papers by Winners of Nobel Prize for Economic Sciences here.
