Promoting economic development, especially in the African continent, to sustainably develop its people and institutions is now a primary concern for every society. Decision makers are usually operating with multiple goals and multiple criteria that conflict with each other's. In order to come up with a decision that can achieve the targeted economic growth, Multiple Criteria Decision Making (MCDM) is a suitable framework that could help to solve the problem.

In recent years, practitioners and researchers have devoted much interest to MCDM models and techniques to solve economic development issues such as poverty, wealth, energy and other topics that help to improve the economic, political, and social well-being of people. This special issue of [JMCD](#) aims to bring the spotlight on MCDM models and techniques that have helped economic developers to achieve their targets.

We are particularly interested in publishing papers addressing the broad issues relevant for economic development in Africa and especially those presented in the track "Decision Theory and Multiple Criteria Decision Aid" at the 2018 International Conference of the African Federation of Operational Research Societies (AFROS 2018) to be held in Tunis from 2 to 4 July 2018 (<http://afros.tdasociety.org/>). However, we are also willing to extend this call to articles on countries other than those in Africa and that were not presented during the conference.

The special issue will be focused on MCDM models addressing one of the following topics:

- Economic Development Theory
- Economic Development Practice
- Economic Development Finance
- Sustainable Development
- Workforce Development
- Community Development
- Industrial Location
- Globalization and Foreign Trade
- Any other topics related to Economic Development

Important Dates

- Deadline for full paper submission: 15 November 2018
- Notice of acceptance/rejection: 28 February 2019
- Revised paper submission: 15 April 2019
- Final decision: 15 June 2019
- Expected publication: October 2019

Submission Instructions

The *Journal of Multi-Criteria Decision Analysis* operates an online submission and peer review system that allows authors to submit articles online and track their progress via our submission website at <http://mc.manuscriptcentral.com/mcda>.

When uploading your paper, please state in the cover letter that the paper is intended for this special issue.

The papers will be reviewed according to the editorial policy and standards of the *Journal of Multi-Criteria Decision Analysis*. The papers should be original, unpublished, and not currently under consideration for publication elsewhere. Prior to submission, please ensure that your paper adheres to the journal's author guidelines, which can be found at:
